Other Data/Comments:

Subjective:

67 year old female with *MS, DM type1, CHF, MS, megaloblastic anemia, hx of chronic neck pain, hx of low back pain, CKD, b/l hearing loss--wears hearing aides, hx of polyps of the colon, depression and insomnia*, presents today for semi Annual Assessment.

Patient is scheduled for surgery of the c spine later this month. Pt currently states that she is not having as much pain of her neck vs her lower back. Pt describes that her pain starts in the lumbar spine and radiates below her buttocks. Pt denies any recent trauma or injury of her back. PT denies any changes in bowel/urinary habits. Pt recently has lower xray imaging and has been referred out to pain management for further evaluation.

Pt currently denies any chest pain, no heart palpitations, no dizziness or vertigo. PT denies any cough, no shortness of breath or difficulty in breathing. Pt denies any headaches, no blurry vision or double vision. Pt admits to constipation intermittent. Pt denies any recent ED visits or hospitalizations.
