Other Data/Comments: , O2:98%

Subjective:

The patient is an 84-year-old female who presents for constipation, Parkinson's disease, and depression.

She reports experiencing constipation, with a sensation of incomplete bowel movements. She has been researching dietary modifications to increase her fiber intake but has not yet tried MiraLAX or senna.

She mentions that she received a call from GreenRx today, informing her of a pending medication delivery. She is nearing the end of her carbidopa-levodopa supply and anticipates receiving a refill soon.

She is currently on medication for depression, which she reports as being effective. However, she still experiences occasional episodes of tearfulness.

Objective:

Medications: Current: Carbidopa-levodopa

Assessment/Plan:

1. Constipation.

Her constipation is likely due to her age and Parkinson's disease, which can cause narrowing in the bowels. A prescription for MiraLAX powder will be sent to her home. She is advised to take one package with a glass of her preferred liquid daily. If constipation persists, she can increase the dosage to one package in the morning and one at night. Once normal bowel movements are achieved, she should continue with one package daily. If diarrhea occurs, she can discontinue the use of MiraLAX.

2. Parkinson's disease.

She is currently taking carbidopa-levodopa for Parkinson's disease. She mentioned receiving an automated message from GreenRx about a delivery, which she assumes includes her carbidopa-levodopa. She is advised to contact the office if she runs out of her medication before the next delivery.

3. Depression.

She reports that her medication for depression is going okay, although she still experiences intermittent episodes of tearfulness. She is encouraged to continue her current medication regimen and to reach out if she feels her symptoms are worsening or if she needs any adjustments.

Follow-up

A follow-up appointment is scheduled for 6 weeks from now.

• **Medication** : Polyethylene Glycol 3350 [polyethylene glycol 3350 17000 MG Powder for Oral Solution]

Qty : 510 R : 1 DEA : FR9334335

Take orally 1 capful mixed in 8 oz of liquid daily

(As Needed) for constipation. 0.8g/kg. Use shortest effective treatment duration. SEND 1-2d
